

COKE LAND

The Harvard Conservation Trust acquired the Coke and Newsham lands in 1997 and 1998 in order to protect this 27 acre parcel adjacent to the town center. The trail starts at Whitney Road and follows existing snowmobile trails traversing wetlands, abandoned meadows and uplands. The Coke land abuts the new Public Safety Building and the Eastview Conservation land. It is hoped that future trails will connect Whitney Road through the Coke land with the Public Safety Building and that a pedestrian pathway linking the Public Safety Building with the Town center along Eastview and adjacent conservation lands will be developed.
