

# OLD MILL ROAD

The 24 acre Old Mill Road property, originally part of Fort Devens, was conveyed to the town for public park and recreation purposes by the Department of the Interior after it was declared surplus land. The Old Mill conservation land contains three distinct ecosystems: a pine barrens (1 of 2 known in Harvard), an upland woodland containing a mix of evergreen and deciduous trees and the Cold Spring Brook waterway which includes an abandoned beaver dam with a small pond and bordering wetland. Please stay on the trail in order to preserve the fragile growth in the pine barrens.

Approximate walking time for primary trail: 30 mins. - easy
